DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gerald Shekleton on 12-14-05.

The application has been amended as follows:

1. Line 1 of claim 8, after "arrangement as claimed in claim", delete -- 4 --, and enter -- 2 --.

The purpose of this examiner's amendment is to change the dependency of dependent claim 8 to depend on claim 2.

2. Line 1 of claim 61, after "system as claimed in claim", delete -- 44 --, and enter -- 40 --.

The purpose of this examiner's amendment is to change the dependency of dependent claim 61 to depend on claim 40.

Allowable Subject Matter

Claims 1, 2, 6-41, 45-63 and 66-118 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the

Art Unit: 2873

claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper.

The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 22, 40, 62, 63, 66, 67 and 68.

Specifically regarding claims 1, 22 and 40, Schletterer (6525888) teaches the state of the art of an adjustment arrangement of an optical element.

But, Schletterer fails to explicitly teach a combination of all the claimed features including the optical element being selectively deformable by actuators and one end of a lever element being arranged between the two solid joints, one of said solid joints connecting the lever element to the mount and the other solid joint connecting the lever element to a region of the optical element, and the actuator engaging an end of the lever element remote from the solid joints, as claimed.

Specifically regarding claims 62 and 63, Schletterer (6525888) teaches the state of the art of an adjustment arrangement of an optical element.

But, Schletterer fails to explicitly teach a combination of all the claimed features including the optical element being selectively deformable by actuators and alternate ones of the bearing feet being engaged by at least one actuator, as claimed.

Specifically regarding claims 66 and 67, Schletterer (6525888) teaches the state of the art of an adjustment arrangement of an optical element.

But, Schletterer fails to explicitly teach a combination of all the claimed features including the optical element being selectively deformable by actuators and each of the bearing feet engaged by one of the actuators has two pivot points formed as solid joints, as claimed.

Specifically regarding claim 68, Schletterer (6525888) teaches the state of the art of an adjustment arrangement of an optical element.

But, Schletterer fails to explicitly teach a combination of all the claimed features including the optical element being selectively deformable by actuators and on the side remote from the base of the U-shaped bearing foot, a stabilizing element is arranged between the legs of the U-shaped bearing foot and is connected to each of the legs by a solid joint, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
